Davis, Betsy  
Jasnow,

*Words for Students of English* combines features that make it uniquely valuable to students and teachers of English as a Second Language. The volumes are designed for use as core texts in ESL vocabulary classes and as supplemental texts in reading, speaking, or writing classes. They may also be used for individual study.

Volumes 1 and 2 of the series can be used with beginning level

students, Volumes 3 and 4 with intermediate students, Volumes 5 and 6 with high-intermediate or advanced students and Volume 7 with advanced students.

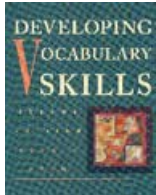

Each volume consists of twenty-five units that present ten to twenty-five base words with definitions, examples, and exercises, all of which contain only previously learned vocabulary. Each unit in the series focuses on a specific topic, chosen for its relevance to students' lives (e.g., sports, school, transportation, work), so that students can practice new words in meaningful contexts.

The exercises are flexible and easy to use; taking the student from simple, fairly controlled practice to a final phase with communicative exercises. Word form charts, indexes, and an answer key for certain exercises are included.

Audio tapes of all the base words and their derived forms on the word form charts are available.

*Words for Students of English* has been developed and tested by the English Language Institute of the University to Pittsburgh.

Focus: The revised edition of this vocabulary text teaches students to analyze, understand, and remember vocabulary by developing word attacks strategies. New readings, collaborative exercises, and contextualized activities enhance the text.

Features:

- Logical grouping of suffixes, prefixes, and roots enhance students' ability to learn these vital language elements.
- Word attack strategies are taught with applications to the reading process.
- A wide variety of exercises provides alternative contexts for remembering and using vocabulary.
- Vocabulary development is taught as an integral part of the reading process, not as an end in itself.
- New to the Second Edition: more relevant readings, more contextual exercises, and new series of collaborative exercises.

## Wordly Wise 3000 2nd Edition

Hodkinson, Kenneth  
Adams, Sandra  
Books 1-12

This popular vocabulary series offers 3,000 carefully selected words from literature, textbooks, and SAT-prep books to instruct by using reading, writing, and a variety of exercises.

Each 15-word lesson begins with an alphabetized Word List that gives pronunciations, parts of speech, and concise definitions, and uses each word in a sentence. Engaging sentences provide a mnemonic anchor for the word.

Books 1–5 contain the following exercises:

Exercise A: Finding Meanings—Students choose 2 phrases from among 4 to write a sentence that correctly uses a word from the Word List

Exercise B: Just the Right Word—As in the original Wordly Wise, students substitute the precise vocabulary word for a synonymous phrase

Exercise C: Applying Meanings—Students answer questions that require them to apply the meaning of the vocabulary word to a particular situation

Exercise D: Word Relationships—In Book 1, students complete a two-sentence description of a situation by supplying a vocabulary word. Book 2 calls for recognition of synonyms and antonyms; Books 3–5 add analogies.

Exercise E: Narrative—The nonfiction reading selection includes the lesson's vocabulary words in context. Comprehension questions follow the narrative and either include the vocabulary word or ask the students to include the word in their answers. Narratives are informative and fun; they are an excellent way for students to absorb new words and their meanings.

In Books 6–9, all exercises become more challenging. For example, in Exercise D, students read 3 sentences, none of which contains the vocabulary word, and decide which situation described in the sentences suggests the word. Analogies are more difficult and narrative topics, more suited for older students, are written in a more complex style. They are followed by questions that either include the vocabulary words or are designed to elicit them in their answers.
